

## QUALITY POLICY

### N7 Space sp. z o.o.

We create and develop high-quality software for the space sector, ensuring compliance with ECSS standards, customer requirements, and applicable legal regulations. Our goal is to provide reliable, secure, and innovative solutions that support space missions and the development of modern technologies.

The management and employees of N7 Space sp. z o.o. declare that:

1. **We meet customer requirements, legal regulations, and industry standards**, in particular ISO 9001:2015/Amd 1:2024, ECSS standards, and regulations concerning information security and data protection.
2. **We take into account the impact of climate change** on the organization's activities and the requirements of customers and regulators in this area.
3. **We use a process-based approach and the PDCA cycle**, ensuring traceability of requirements from analysis to testing and validation.
4. **We continuously improve our Quality Management System** using the results of audits, management reviews, risk and opportunity analyses, and customer feedback.
5. **We provide the necessary resources and expertise**, developing our employees' knowledge through training and participation in ESA/EU projects.
6. **We are building a culture of quality and information security**, in which every employee knows their role and impact on the final result.
7. **We invest in innovation and process automation** to increase efficiency and competitiveness.

The Management Board of N7 Space sp. z o.o. is responsible for the implementation of the Quality Policy, with the active participation of the QMS Representative, project managers, technical leaders, and all employees. Every member of the organization is required to comply with the QMS rules and support its improvement.

President of the Management Board  
Michał Mosdorf
